

## **SATATYA SIGHT**

### Mobile Application for Enterprise Video Surveillance

Video surveillance is at the core of a modern organization's security strategy. Most video surveillance solutions offer live monitoring, playback and event notifications to users stationed at one place. However, key decision makers and managers are required to travel for professional and personal reasons. They cannot afford to remain isolated from the happenings in their offices, factories and other operations, weakening their security control. To overcome distance and time barriers, they need live visibility and prompt notifications, helping them maintain control of their operations and take faster decisions.

Presenting Matrix SATATYA SIGHT - A comprehensive video surveillance application for mobile devices. It is designed for smart phones and tablets running popular operating systems such as Android and iOS. It connects to multiple SATATYA recording devices such as NVR, HVR or DVR and offers viewing of all the locations and cameras in a single window. In addition to consolidated live view, it also offers playback, search and event notification providing users complete visibility and control over their operations.

## KEY FEATURES

### Manage Security Centrally without a Static IP

SATATYA SIGHT can connect up to 50 devices in any combinations of NVR, HVR and DVR without needing a static IP address. SATATYA SIGHT offers all possible connectivity options including IP address, DDNS, Matrix DNS, MAC Address and Host Name. User can select any device from the list of these devices for live view, playback, notifications, etc.

### Efficiently Manage Bandwidth

While roaming, users may not get uniform bandwidth due to network and cost reasons. In such situations, SATATYA SIGHT uses higher bandwidth for important cameras and lower bandwidth for others. Using bandwidth optimization logic, it requests main stream for high resolution and sub-stream for low resolution camera window. It also allows users to easily toggle between main stream and sub-stream.

### Safeguard Pictorial Evidence

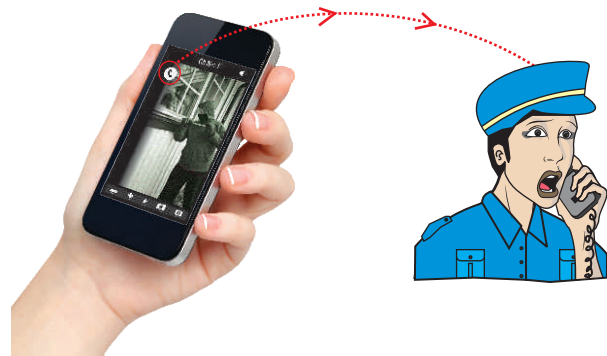

User can take a snapshot while watching live video streams or playback just by clicking on the snapshot icon. SATATYA SIGHT saves this snapshot as a regular photograph on the mobile device. User can share this via email, Whatsapp or use this as a pictorial evidence of the event.

### Detailed Inspection

User can inspect the details in any area of his interest by zooming in on the specific area. Degree of digital zoom is limited only by resolution and clarity of the stream received from the camera.

### Save Time with Smart Search and Playback

SATATYA SIGHT offers complete access to all recorded videos on recording devices eliminating location and distance barriers. User can playback recorded video directly from SATATYA SIGHT. Various search options are offered such as start date-time, end date-time and recording type (motion, COSEC integration, scheduled, etc.)

### Call the Right Person Instantly

While watching video streams on his mobile device, user might notice something important and needs to speak to the concerned person. SATATYA SIGHT allows user to configure a contact number for each camera which is shown as 'Calling Icon' on the top-left corner of video window. User can instantly call the concerned person by clicking this icon instead of losing valuable time in searching and contacting the right person.

### View Critical Cameras Quickly

SATATYA SIGHT aggregates multiple devices, each having multiple cameras. All these camera streams do not carry equal importance. Managers need to focus more on certain camera streams covering vital operations or high priority areas. Managers can set these cameras as their favorites. They can quickly switch to their favorite camera view just by selecting one of the favorites.

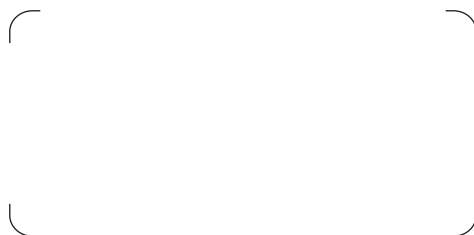

### Flexible Maneuvering of Camera

User can control PTZ camera connected to any device offering complete flexibility in maneuvering direction, angle and zoom of the camera for closer inspection of specific area. SATATYA SIGHT offers user friendly and intuitive PTZ controls.

## ABOUT MATRIX

Established in 1991, Matrix is a leader in Telecom and Security solutions for modern businesses and enterprises. An innovative, technology driven and customer focused organization; Matrix is committed to keep pace with the revolutions in the telecom and security industries. With around 30% of its human resources dedicated to the development of new products, Matrix has launched cutting-edge products like IP-PBX, Universal Gateways, VoIP Gateways and Terminals, GSM Gateways, Access Control and Time-Attendance Systems, Video Surveillance System and Fire Alarm Systems. These solutions are feature-rich, reliable and conform to the international standards. Having global foot-prints in Asia, Europe, North America, South America and Africa through an extensive network of more than 500 channel partners, Matrix ensures that the products serve the needs of its customers faster and longer. Matrix has gained trust and admiration of customers representing the entire spectrum of industries. Matrix has won many international awards for its innovative products.
