

Matrix EON74

A Slim-line Turret for Simplified Trading Communication

In the highly volatile stock trading business, a delay of a second can cost millions to the trade exchanges and dealers. Simultaneous communications, timely tips-and-clicks and transmission of information in seconds determine the success of trade exchanges. Trading houses are business places where the combination of a skilled trader and an efficient technology stimulate the business growth and revenue at the large. Trading turret is the technology that enables traders and dealers to prioritize the incoming calls from investors and member firms. It also enables traders to make simultaneous calls to the same groups instantaneously through single button press.
